Very good „Halloween Theme PrisoM" for The Escapists 2! Really love it! Cool desing,escape ways and animations! :D. *very very loud farting noises*. Would've liked it if it would have been at least an Audio Book with a nice narrator-voice. Its not so much interactive and story is not very deep. As a lil personal project it's okay, but would not recommend it to anyone.. why isn't it English. Cant get it to play

. The pig hot air balloon is REALLY scary + running diagonal makes you go faster which is cool I guess. Merica \u2665\u2665\u2665\u2665 yeah!. 30 minutes long. (10 puzzles in total) Super short with one passage that made me almost vomit from the bad framerate.. I downloaded Adventures of Fluzz as an experiment. I wanted to play a game that had absolutely no review on it, and do my part for the Steam community by writing a comprehensive review that will help inform others before purchasing.

My expiereince of Adventures of Fluzz:

In the world of FLuzz, not everything makes sense. YOu're not told all the controls (or even given the option to look them up) but that does add to the sense of adventure somewhat. It's also not quite clear why you are a luminous pink rabbit, running round collecting apples and oranges, rather than carrots....either way, I salute you for trying to break the stereotype of Rabbits always wanting carrots. You will also come up against dogs shotting tomatos, spynx's shooting lasers out of their eyes and mosquitos trying to defecate on your rabbit head. (also hedgehogs in the desert, but please let me if this is actually common IRL)

Despite the somewhat strange concept of this game, it is quite and entertaining distraction and it borrows alot from classics such as Mario and Sonic.

It's not quite as polished as it could be (i had difficulty returning to menu etc when dying) but it was a relatively fun 45 minutes for the price of a large Mc Donalds. And who can say that's not good value.

I also got to number 39 on the worldwide leaderboards! With some more practice and real commitment, you might even be able to beat Frodo, who is currently holding the number one spot.

Overall, I would recommend this game for a fun light hearted 40 minutes - 1 hour, but would recommend that the dev lowers the price to entice more players.

Thanks for releasing this soundtrack. Music from this game reminds me of childhood memories. Now i can listen to it everywhere.. Wow ! Like wow this game is great relived of past dos games only better it is high rez so you get to see everything the colors are so dos it reeks of dos goodness without the command line of course just got it and only played a few minutes of it but from what I've seen it will be one like commander keen .. Very nice and detailed area. Only dissapointment is that there is no high-res link between Switzerland area. Would be cool to flight between those two areas.. It's a fun little golf game! Decent challenge too, glad I backed it.

. Been playing Alteil since about 2009 or 2010? I forgot.

Pretty good game, you can see your whole deck from the start and place them down being mindful of your SP curve and such things. It takes practice. Dont worry about RP and just smash faces in.

Alteil Steam client is currently a work in progress but is working. Just if that sluggish response when i try to open discord while having steam client active at same time be gone will be great.

And tidalwave isn't core. :3 Basically Tidalwave abuse got banned unless you're playing noncore :p

Thus it gets a 4V5 from me.. So good to see the classics back.. Does not like current OSs it seems, screen would black out when launching into gameplay. Gameplay that did happen without crashing, this game marks the beginning of the end of the Rainbow Six series with ugly gameplay compared to Raven Shield and before.

Do not buy.

Spend your money on the equally priced Rainbow Six 3 Gold (Raven Shield collection).. I had so many good times playing this, i practically melted the cd with how much i used to play it on my old win 95 toaster! i cant even tell you how many hours i spent. The game, for what it's worth, is legendary. it will go down in history as one of the best RTS battlefield / turnbased strategy games ever, and is easily a progenator to the total war series. It also is the same designer as stronghold/stronghold crusader, two more of my favorite games.

unfortunately, this is unplayable online. you would literally have to connect 2 computers to play, and even then, i'm not sure its possible; this game is super old. I really wish that someone would rebuild the engine for this for modern computers, because its clear the current owner of the IP will never do so. That is very unfortunate.. **BEST GAME EVER BETTER THAN COD BLOPS 3 FOR ZOMBIES AND BETTER THAT CSGO FOR MULTIPLAYER BEST GAME EVER 1998 GAME OF THE YEAR REWARD**

-jack spedicy

and jack jefflan. my favorite one is missing :(please add the song playing after launching the game, that would be awesome!
