Weapons, augs and tools available are nice, yet confusing even after having played all normal Deus Ex'es. Gameplay is ok, missing some sharpness in movement. The first few 'servers' are nice. After that the difficulty rises parabolically trying to make you buy premium stuff.. Best game i've played in a long time!. Right up there with the likes of Geometry Wars and Waves. One of the best Twin-Stick Shooters in recent years.. was not like i thought it was going to be. I am heavily impressed by this DLC! If you're bored with German highways and would like more eye candy stuff - just get it and you won't regret!

I've been travelling in and around Innsbruck and the change of quality is visible at first glance. The downside of this is that now Germany really needs some reworks here and there to keep up with this DLC quality, nevertheless I did not expect such succesful release.

Some say it's pricey, probably depends on fx rate, yet I think it's a necessary addition to vanilla to make the in-sim world look more realistic. Also, as prep for this DLC, TML released a patch with couple of bugfixes - kudos for that!

Performance of DLC is really fantastic. No FPS drops, running it with i5 3570K @4,5 GHz and GTX 970 from EVGA. All in all - supersatisfied.

Now back to driving my Setra on Austrian highways!. I don't feel like wasting my time reviewing this game so to keep it simple don't buy it. The controls are awful the mechanics within the game don't work at all and when they do are pitiful at best. The graphics especially on the character model are just awful and are seemingly done straight out of the PS1 era. And lastly for 7 dollars you could actually nab up a good game. Just keep the money in your pocket and leave this one on the shelf. 2/10
Certainly not a game I would soon play again if ever. If you would like to see some gameplay where I can't even beat the level because the game is so awfully put together here is a link.

<https://youtu.be/sJirwFc5TTU>. Retrobooster is something as rare as a modern cave-flyer game. Cave-flyers were made popular by indie game developers from Finland in the eraly 1990's with numerous titles in the genre. If you played the game Subterrania on Sega Mega Drive/VGenesis, you will love this game.

This game makes everything right down to the last detail. The physics engine is what really puts this game on the map though. Physics affect everything from ship handeling to shots bouncing off walls and enemies falling down when shot. It's a bloody hard game because the physics engine makes it hard to navigate the ship without crashing into walls. It's also a very detailed game environment with tons of details that makes every map seem different even though it's mostly caves. Even the smoke from the booster rockets reacts to physics and bend around objects.

Put short it's a hard, beautiful, detailed, fun game that works regardless if your play session is 5 minutes or hours.. impossível porque o jogo não entra! que maravilha assim não se pode dizer mal, nem bem!. great game after all the changes and bug fixes the game runs great no crashing cant wait to see what the do with it next!. This game would be much more enjoyable with the addition of tooltips to give you a little more information about the buildings, units, etc.

I think the actual game play is 'okay' but the UI is not very friendly.

Amazing Multiplayer FPS! This game deserves more attention. Totally under rated!. Well titan it is, smells like fart, looks like ♥♥♥♥♥♥ and that's pretty much it no sorry that 'was rude but titan is definitely not a beautiful place. Didn't really play that much since it feels like a VR game, can't really enjoy it that much yet :(.

Promise that I'm going to write a new 1 after I finally receive a VR gear.. Definitely worth the buy if you are into IO games like Agar.io and such. Take that, but add lasers and 3D-ness to all of it with good customization, along with powerups, different stages as you grow bigger, and many passages for the small. As you grow you definitely lose speed, but make up for it in health and power. The bigger you get, the bigger gun, but the slower you shoot. The best part is when you manage to reach Omega form you get tons of points and it has a continuous destruction beam. You are visible from anywhere on the map and when others shoot you they gain mass, but risk getting slightly decimated. After you die, you go into the air and explode like a firework, turning back into the tiniest form to restart. :)

PS: I did in fact refund this game, simply because it was a bit too challenging for me to grasp, but then again, I'm definitely not the best at it, so have fun!. very nice game, very addictive and lots and lots of multiplayer possibility : coop, ctf, survival etc ... the campaign is also very nice and interesting . it will give you lots of pleasure for hours .

for the price you cannot go wrong.. This software that you had developed is rather simple and easy for anyone that wants to edit and use for their videos, so I wanted to say you did an amazing job with this program, keep it going! ^^.

Fast paced Battle Royale, pretty fun. I wanted to give this a good review.

1. My cursor goes off to my left monitor causing me to see the extreme right side of the map in 0.2 seconds. It's 2017, fix the bounding of the gameplay area.
2. My view is FIXED at about 45 degrees down plus or minus 10 degrees. This means I cannot see anything more than 10 meters in front of my guy. Unforgivable. In the previous Men of War games I was given free camera freedom so see from ground level all the way to right on top. Fix this.
3. This I find unforgivable for a Steam title. It failed to work out of the gate. Yeps, I had to again waste my time and go to the internet to find out I have to run the game in compatibility mode for Win7! Um... I RUN Windows 7! Silly.
4. I go to remap the controls and I find it keeps resetting them to the default controls. Again, I had to waste my time to find out I actually had to edit a cfg file for my controls to work.

I am so angry right now I will not make any rash decisions like demand a refund. It might be a good game but for crapsake, polish your game if you are going to ask \$10 again for it!. It's been really interesting so far!. Compared to Spartan Assault, this one has better visual, better control (especially the vehicle), but the missions are monotonous and repetitive compared to Spartan Assault and it's a grindfest, it won't allow to continue to operation E if you don't have all gold stars on earlier missions.
